Perde — Screen Sketches

Event discovery & ticketing platform · 24 screens

SOFT3111.1 Internet and Web Programming · Instructor: Mustafa Taner Eskil

Emre Yeşilördek (21COMP1001) · Tuna Eren Çetin (23SOFT1052)

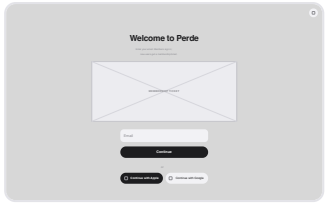

November 3, 2026

Each page shows one screen as a wireframe sketch (left) and as the final, implemented design (right), together with what the user can do there and which screen each action leads to. The wireframes are vector SVG files that can be dropped straight into Figma as editable layers. A clickable version of the same flow is in **3_Navigable_Prototype/index.html** and in the Figma file in **4_Figma/**. The product interface is localised in Turkish; wireframes and annotations are in English.

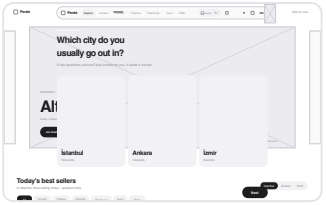

All screens

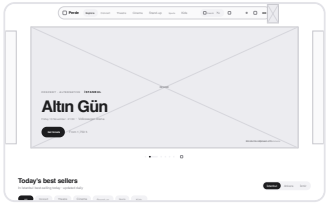

01 · Welcome

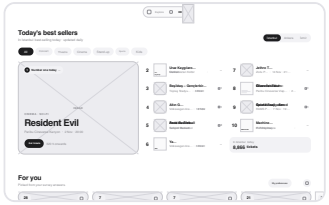

02 · Sign in / Create account

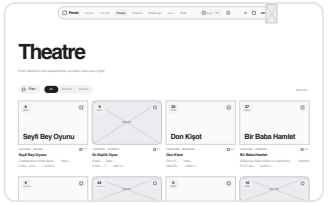

03 · Get to know you (survey)

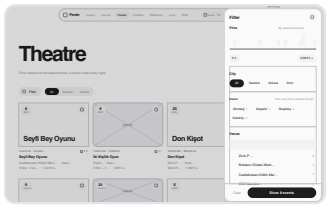

04 · Explore

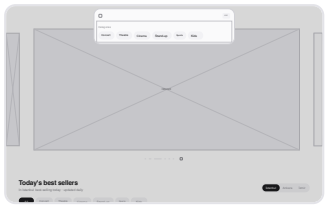

05 · Today's best sellers

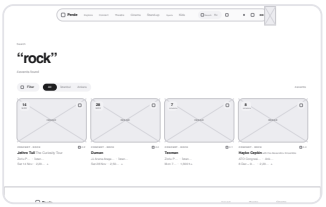

06 · Category: Theatre

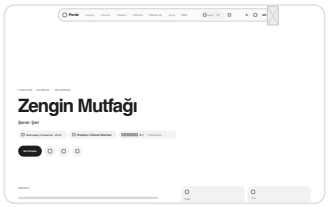

07 · Filters

Main flow: Welcome → Sign in → Survey → Explore → Event page → Choose tickets → Seat map (3D view) → Checkout → Tickets are ready → My tickets. **Also:** Search, Category & filters, Best sellers, Reviews, Suflör AI assistant, Mobile.

01 Welcome

ONBOARDING · DESKTOP 1440 × 900

Wireframe sketch

Final design (implemented, Turkish UI)

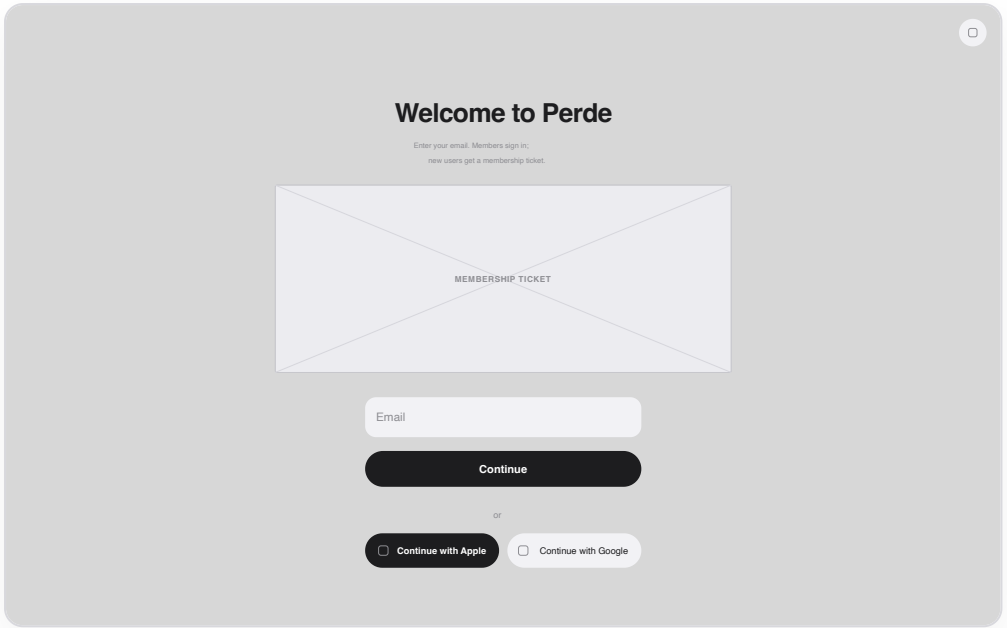

Cinematic red-curtain intro. The curtain opens onto an empty stage and the Perde logo appears in the spotlight.

Sign in or create account → Sign in / Create account

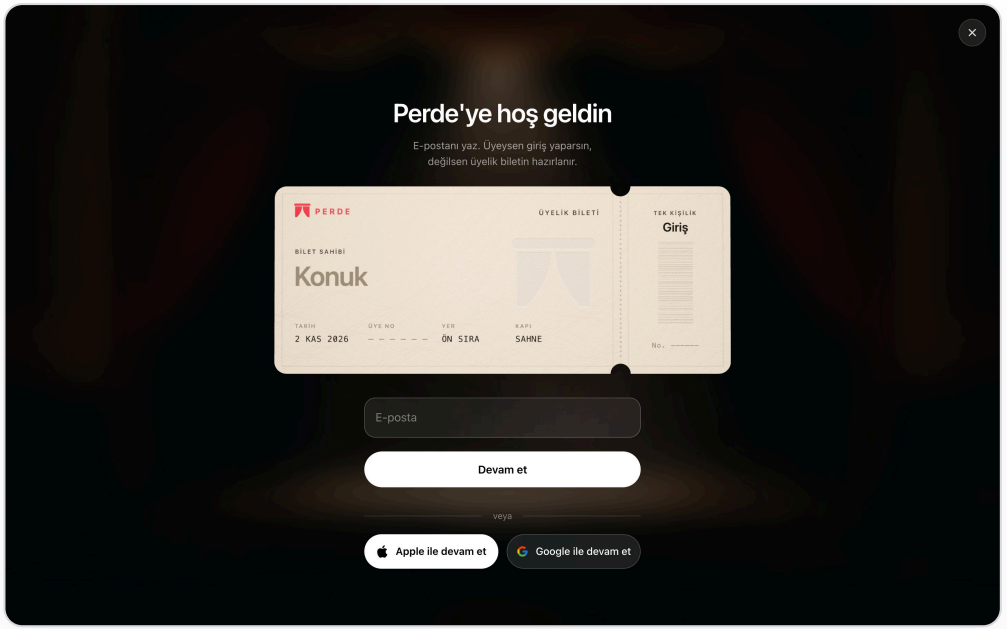

Continue without an account → Explore

02 Sign in / Create account

ONBOARDING · DESKTOP 1440 × 900

Wireframe sketch

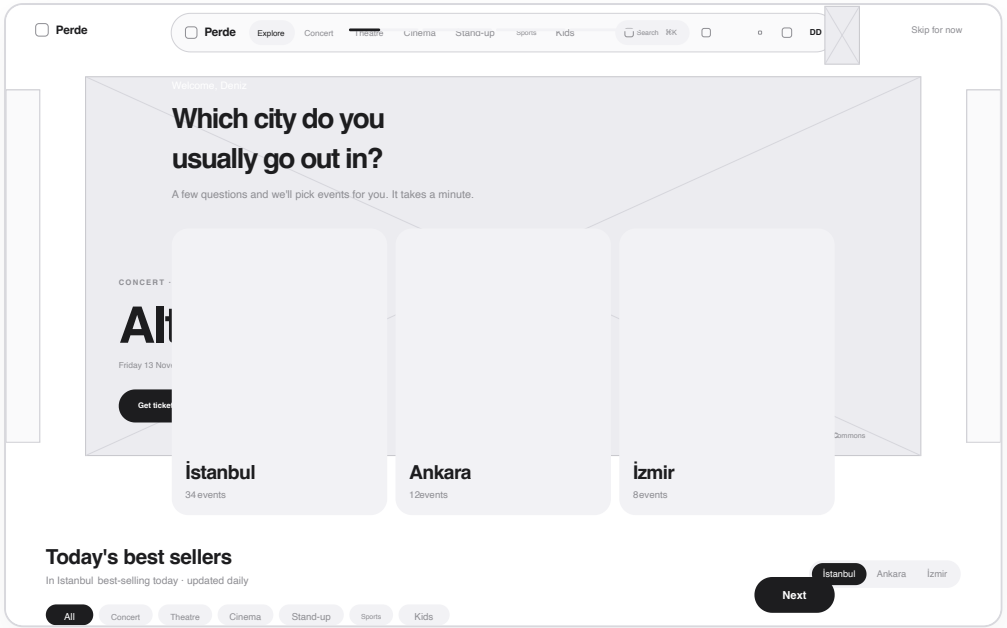

Final design (implemented, Turkish UI)

Identifier-first sign-in printed on a 3D paper membership ticket. When the account is created, the stub tears off.

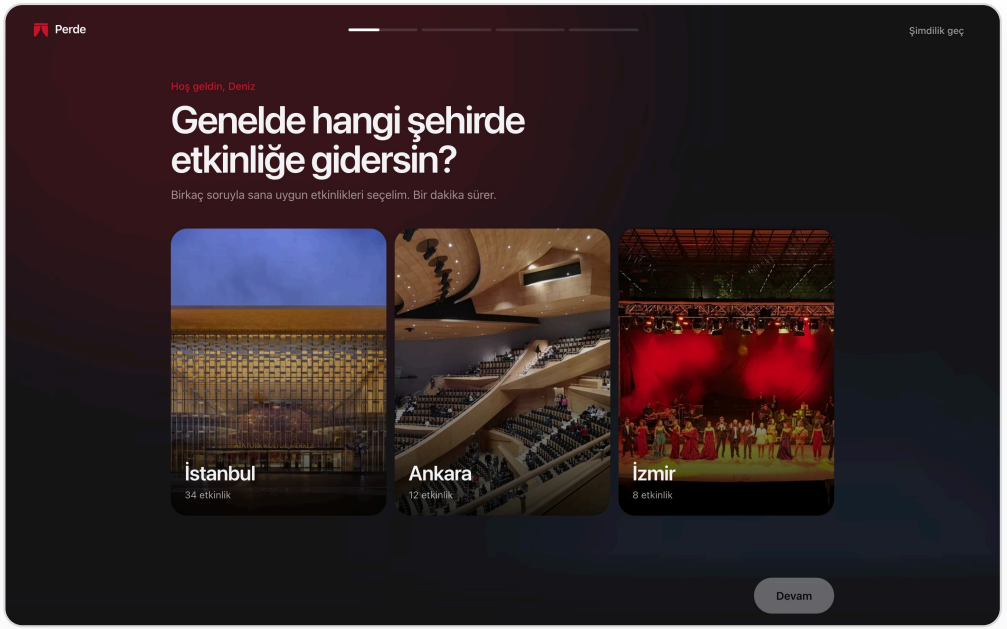

Continue → Get to know you (survey)

03 Get to know you (survey)

ONBOARDING · DESKTOP 1440 × 900

Wireframe sketch

Final design (implemented, Turkish UI)

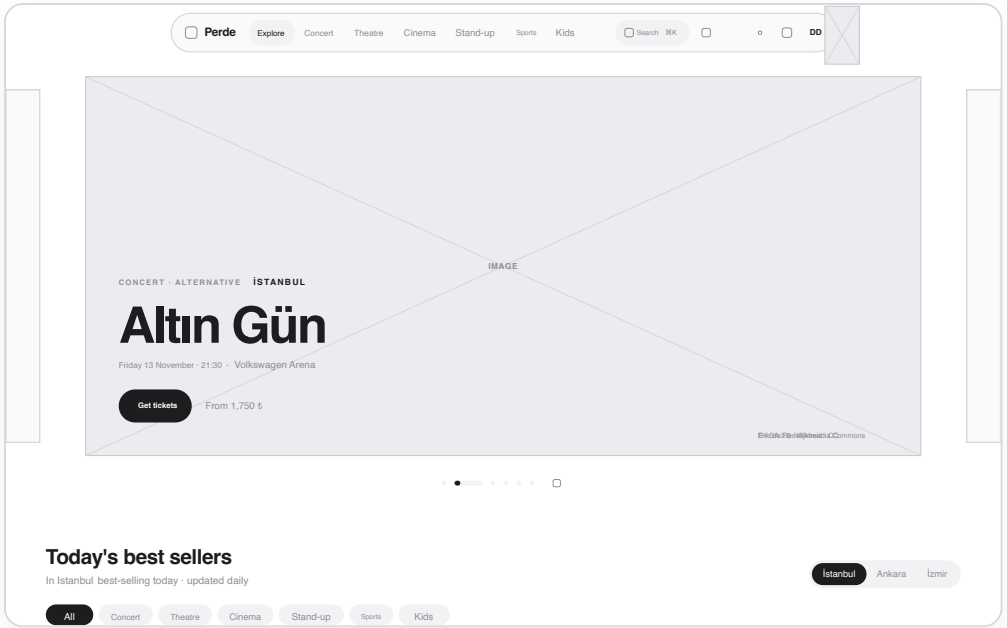

7-step survey: city, categories, genres, artists, teams, timing, company and budget. The answers personalise Explore and the AI assistant.

Next step → Explore

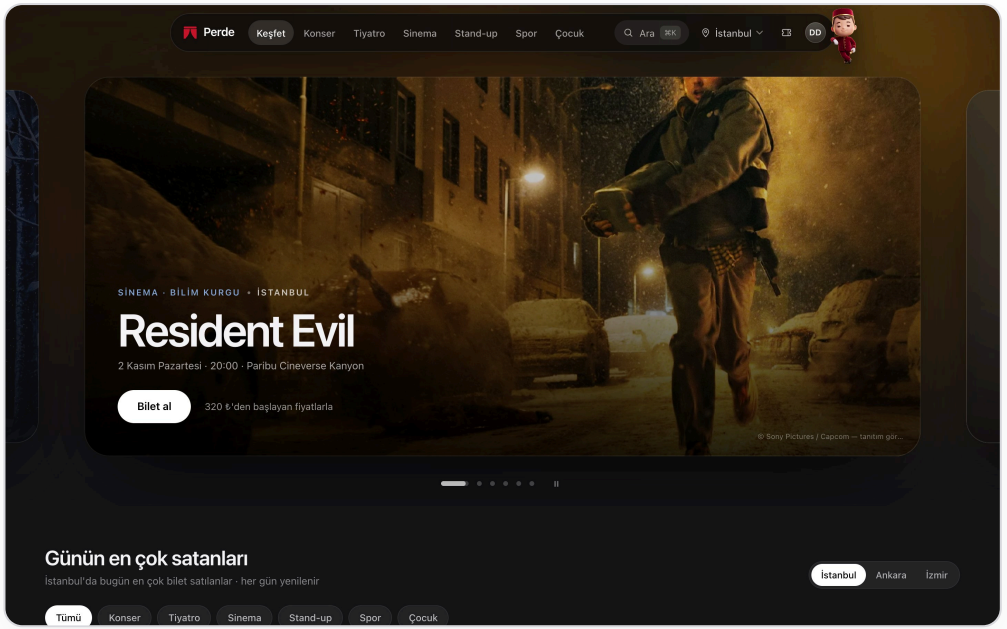

Skip for now → Explore

04 Explore

DISCOVER · DESKTOP 1440 × 900

Wireframe sketch

Final design (implemented, Turkish UI)

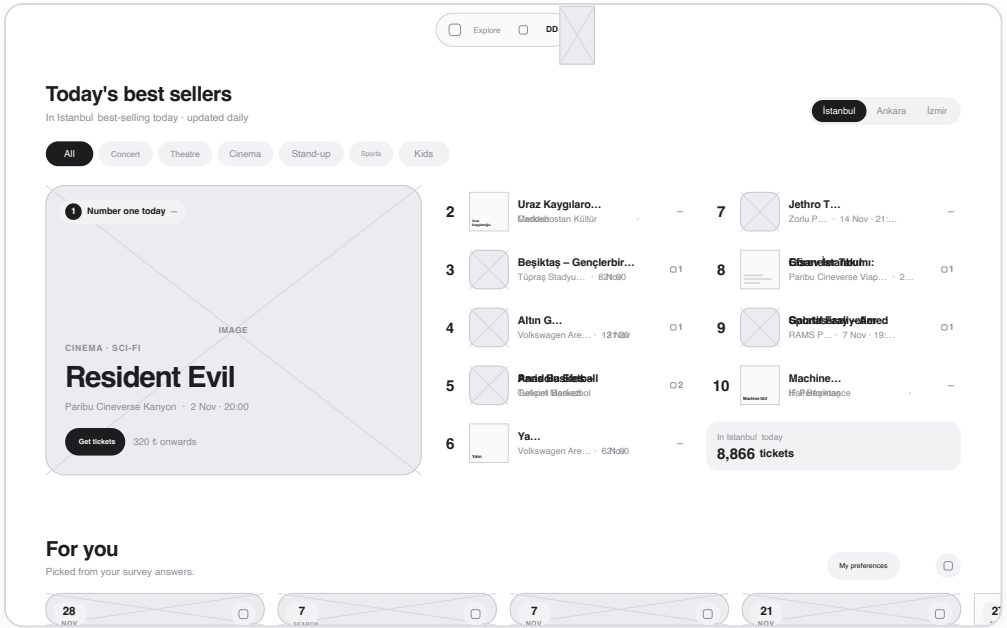

Home screen: Apple TV-style featured carousel under the Dynamic-Island navigation, with Suflör leaning on the island.

Explore → Explore
Theatre → Category: Theatre
Search → Search
My tickets → My tickets

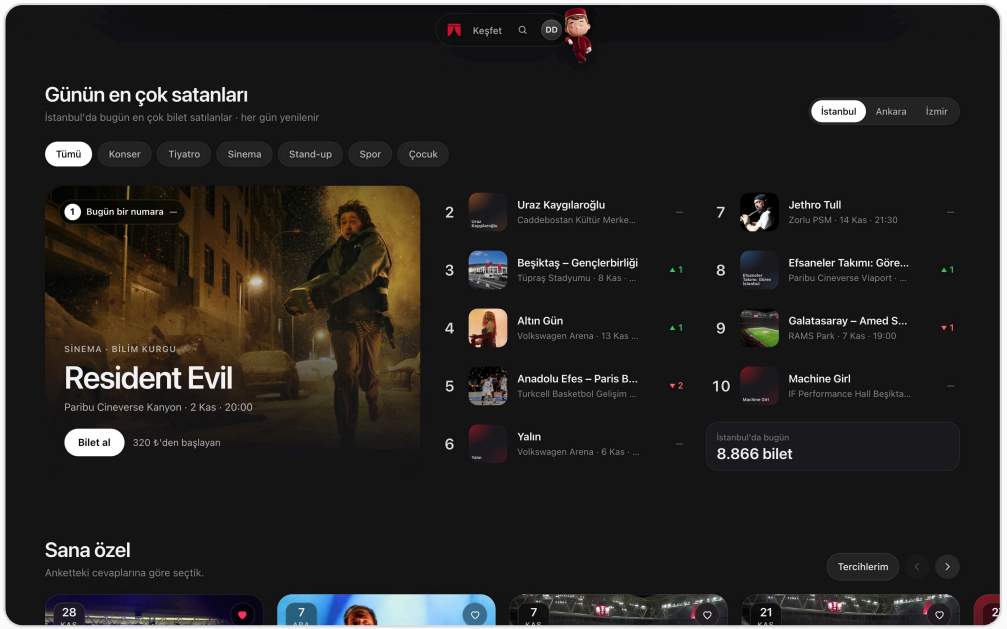

Ask Suflör → Suflör – AI assistant
Get tickets → Event page
Today's best sellers → Today's best sellers

05 Today's best sellers

DISCOVER · DESKTOP 1440 × 900

Wireframe sketch

Final design (implemented, Turkish UI)

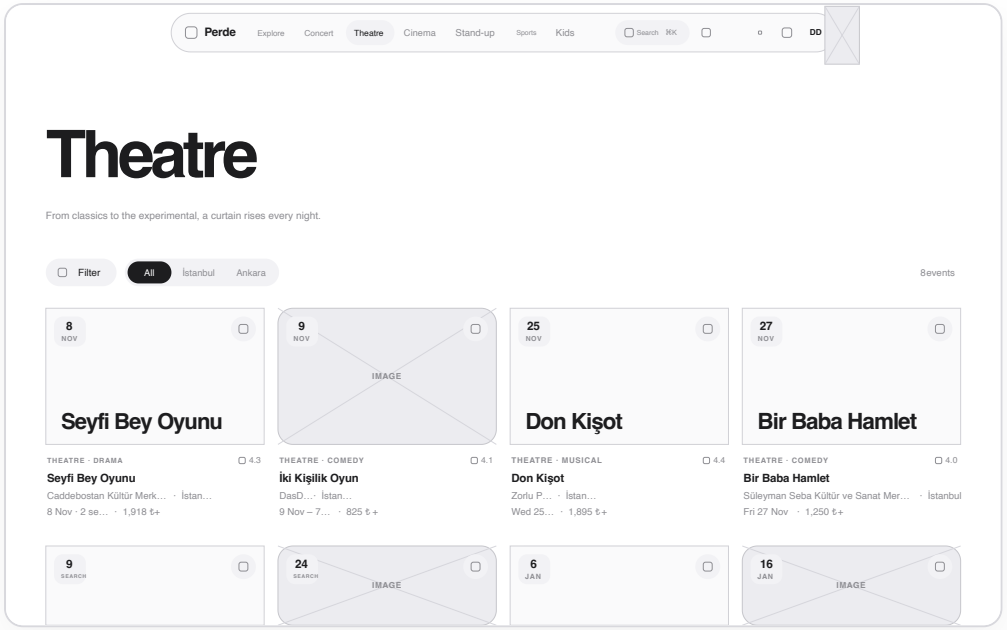

Daily chart per city and category with trend arrows. Number one gets a large card.

Explore → Explore
Search → Search

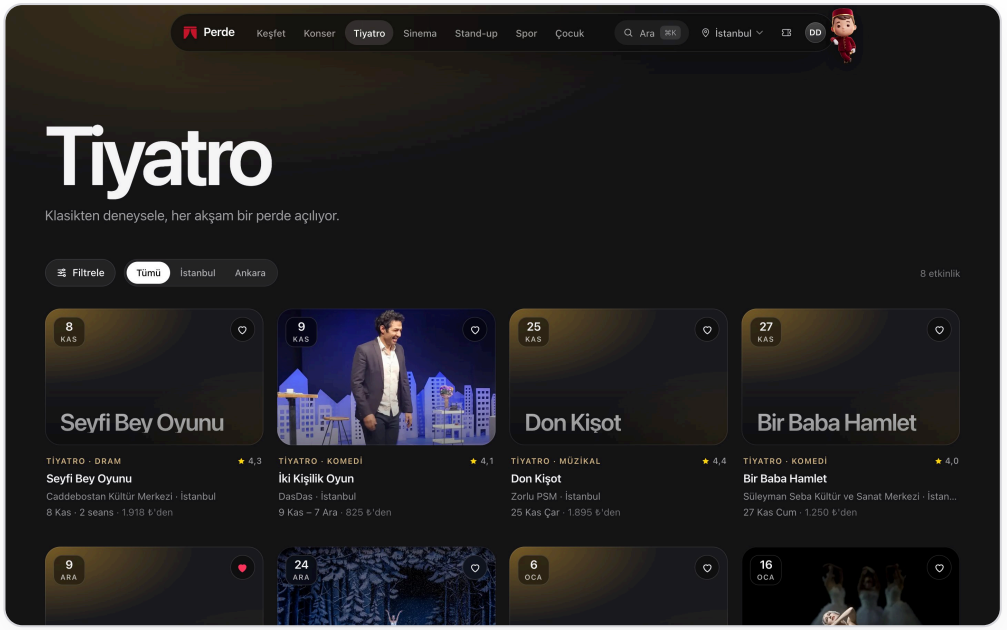

Ask Suflör → Suflör – AI assistant
Get tickets → Event page

06 Category: Theatre

DISCOVER · DESKTOP 1440 × 900

Wireframe sketch

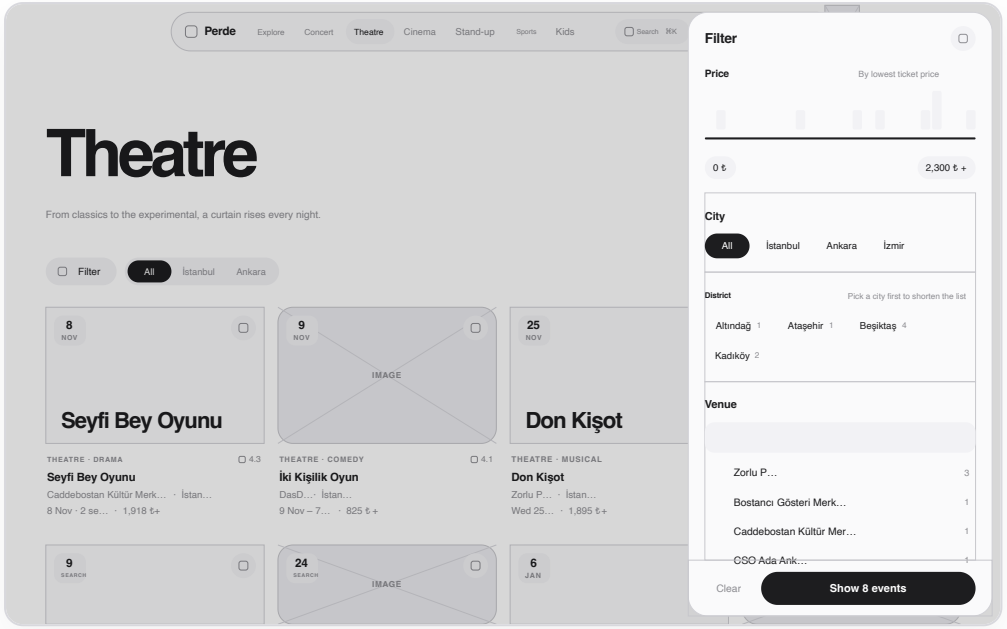

Final design (implemented, Turkish UI)

Category page with city switch, filters and event cards showing ratings and prices.

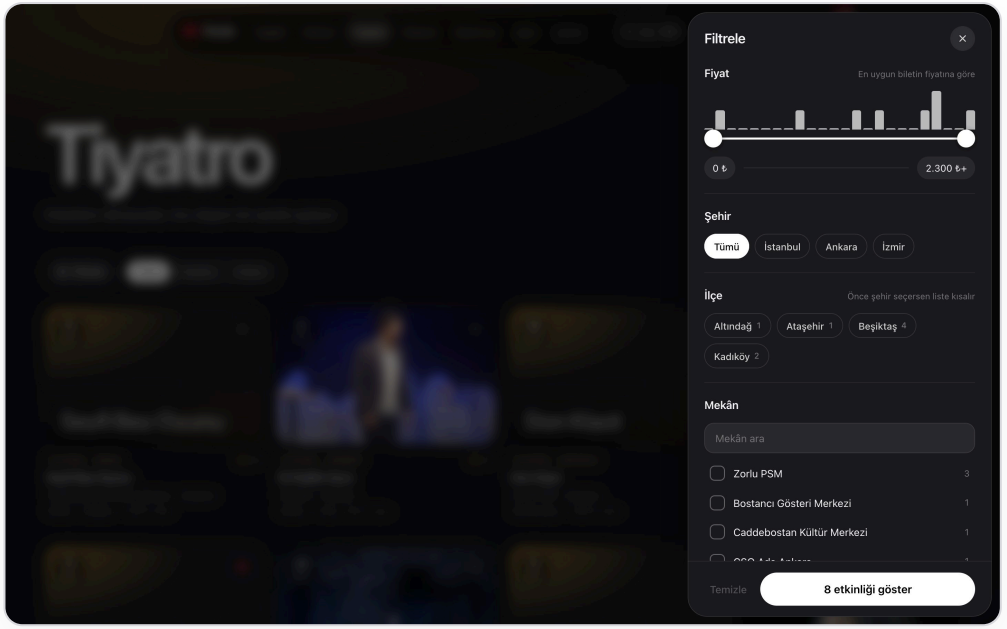

Explore → Explore
Theatre → Category: Theatre
Search → Search
My tickets → My tickets
Ask Suflör → Suflör – AI assistant
Filters → Filters
Event card → Event page

07 Filters

DISCOVER · DESKTOP 1440 × 900

Wireframe sketch

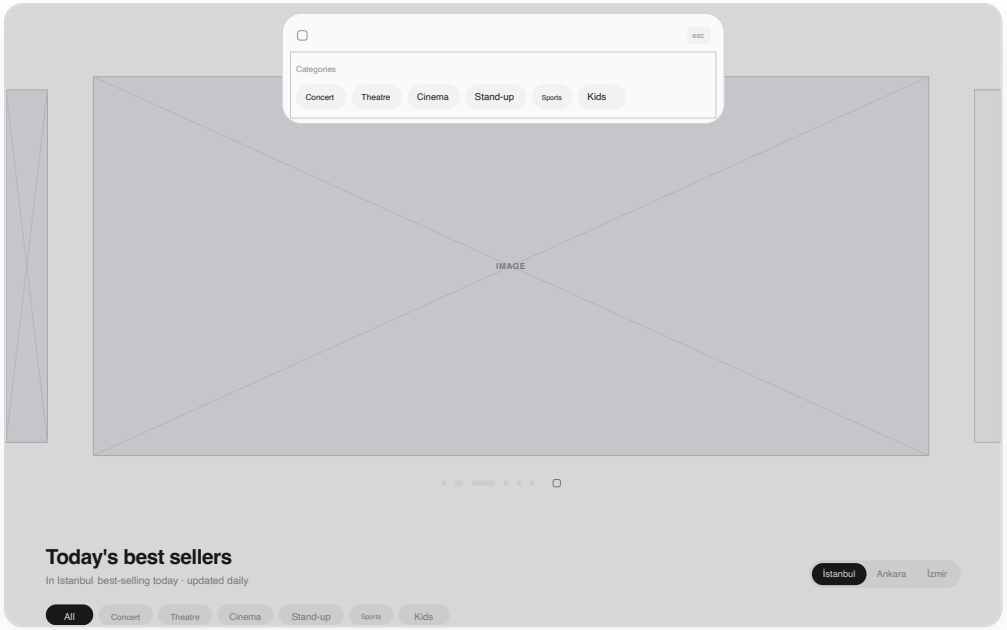

Final design (implemented, Turkish UI)

Filter sheet: price histogram, district, venue, seating type, genre, date window and hide sold out.

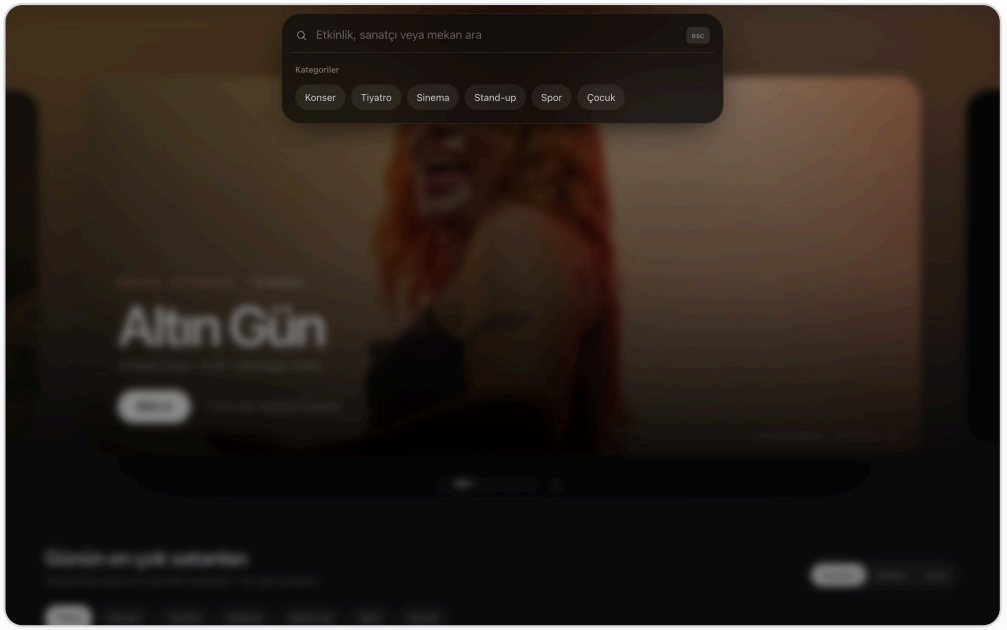

Show results → Category: Theatre

08 Search

DISCOVER · DESKTOP 1440 × 900

Wireframe sketch

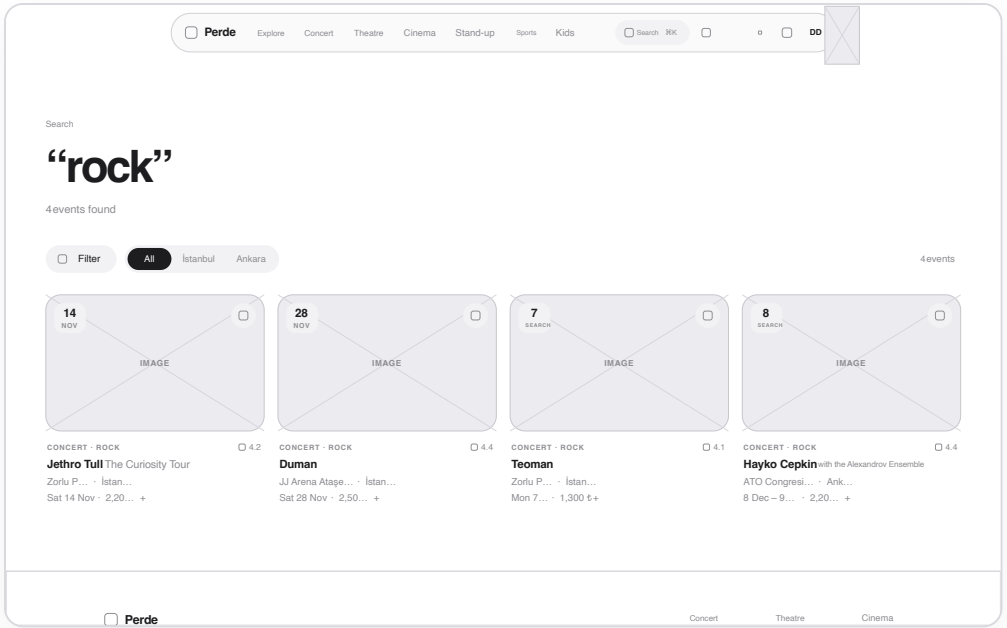

Final design (implemented, Turkish UI)

The island morphs into a search panel (⌘K) with category shortcuts.

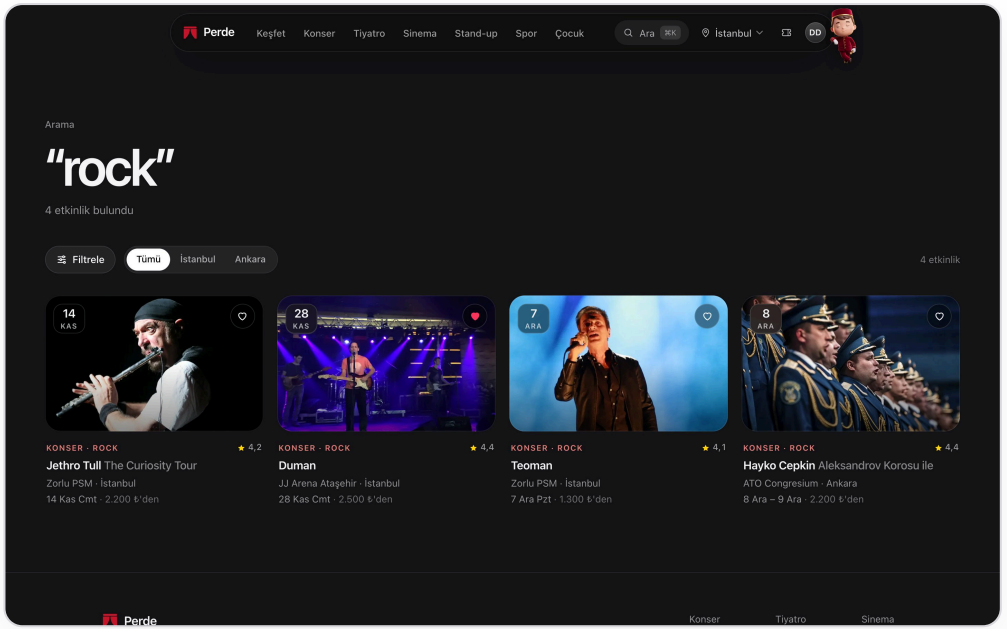

Concerts → Search results

09 Search results

DISCOVER · DESKTOP 1440 × 900

Wireframe sketch

Final design (implemented, Turkish UI)

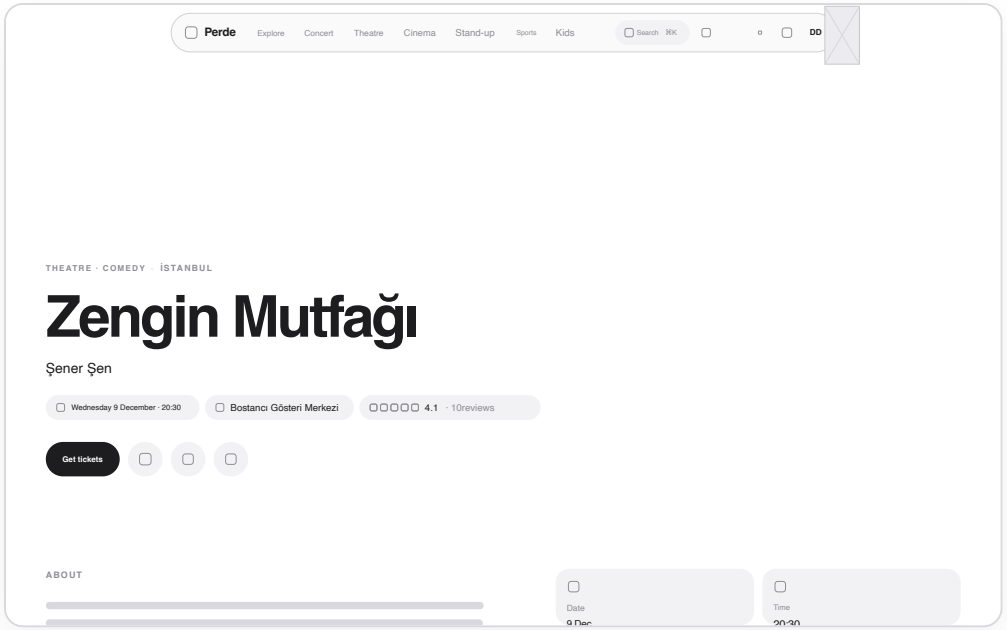

Results for “rock” with the same filters as category pages.

Explore → Explore
Theatre → Category: Theatre
Search → Search

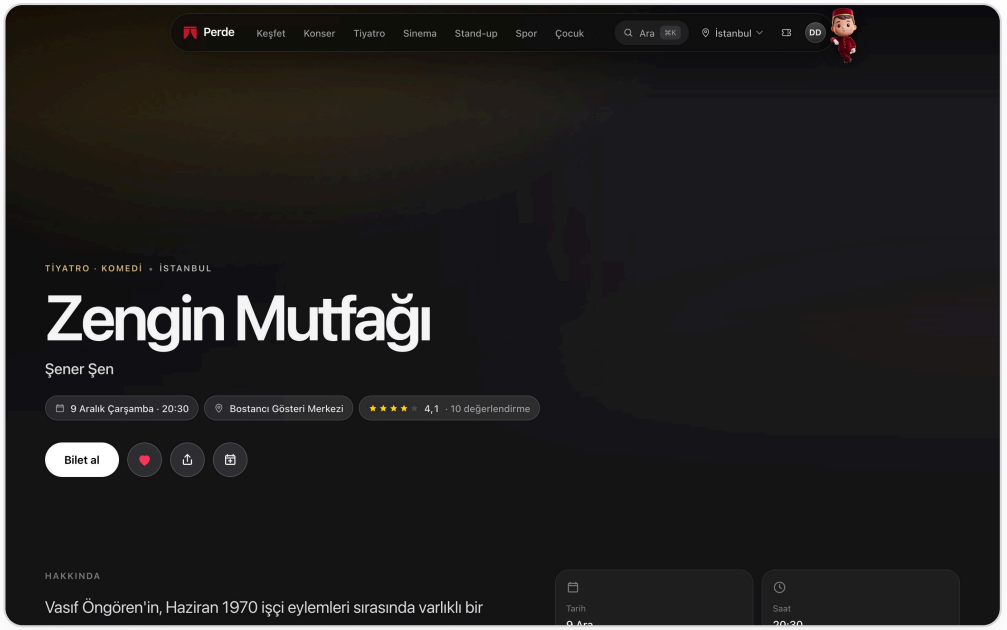

My tickets → My tickets
Ask Suflör → Suflör – AI assistant
Event card → Event page

10 Event page

EVENT · DESKTOP 1440 × 900

Wireframe sketch

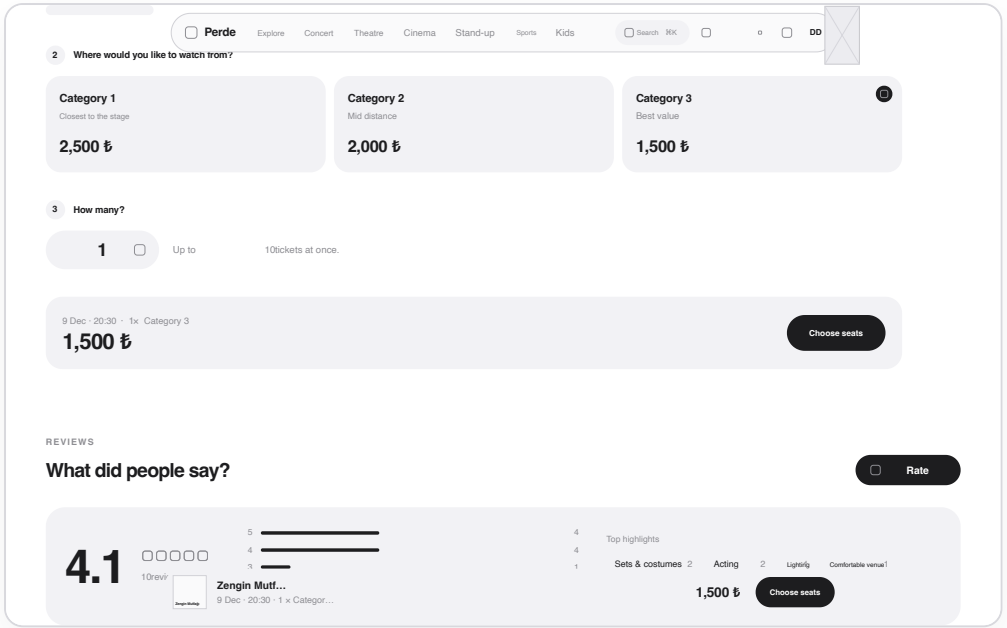

Final design (implemented, Turkish UI)

Full-bleed cover with category, date, venue, duration and rating chips; share, add to calendar and favourite actions.

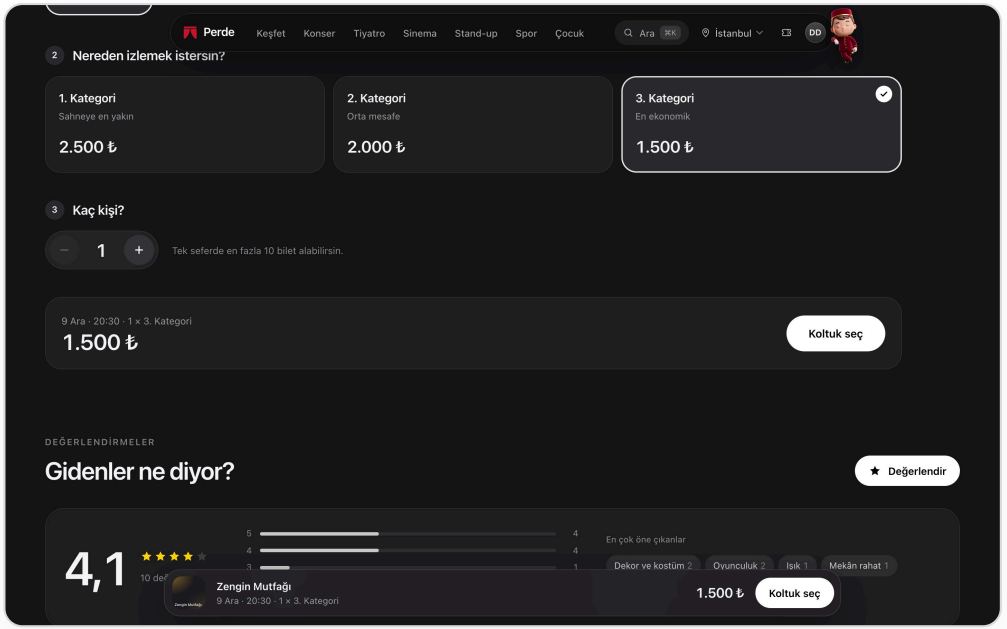

Explore → Explore
Theatre → Category: Theatre
Search → Search
My tickets → My tickets
Ask Suflör → Suflör – AI assistant
Ratings → Ratings & reviews
Get tickets → Choose session & tickets

11 Choose session & tickets

EVENT · DESKTOP 1440 × 900

Wireframe sketch

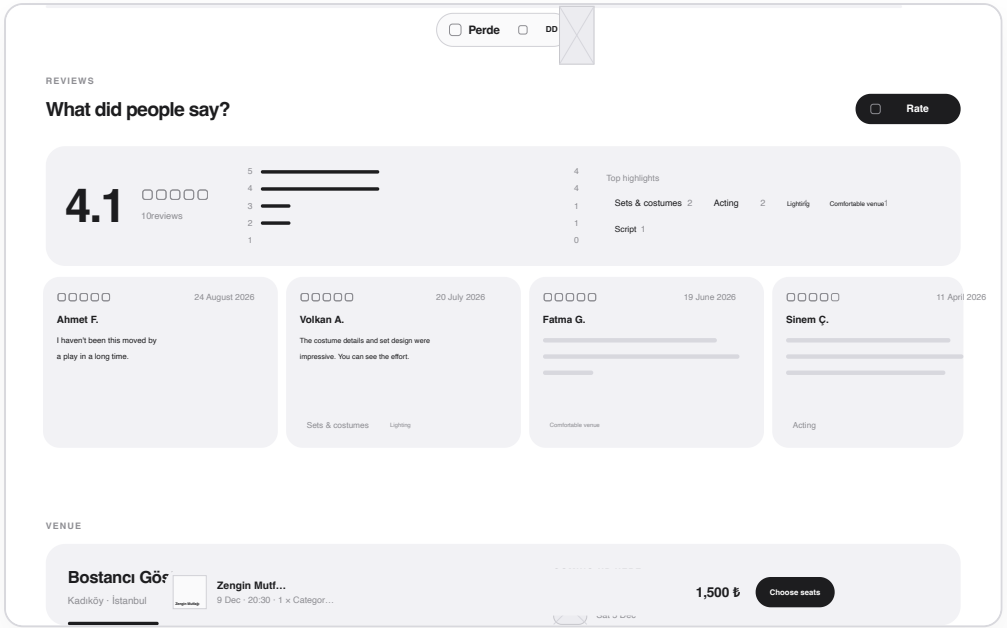

Final design (implemented, Turkish UI)

Apple Store-style picker: session, ticket tier and quantity, with a sticky buy bar.

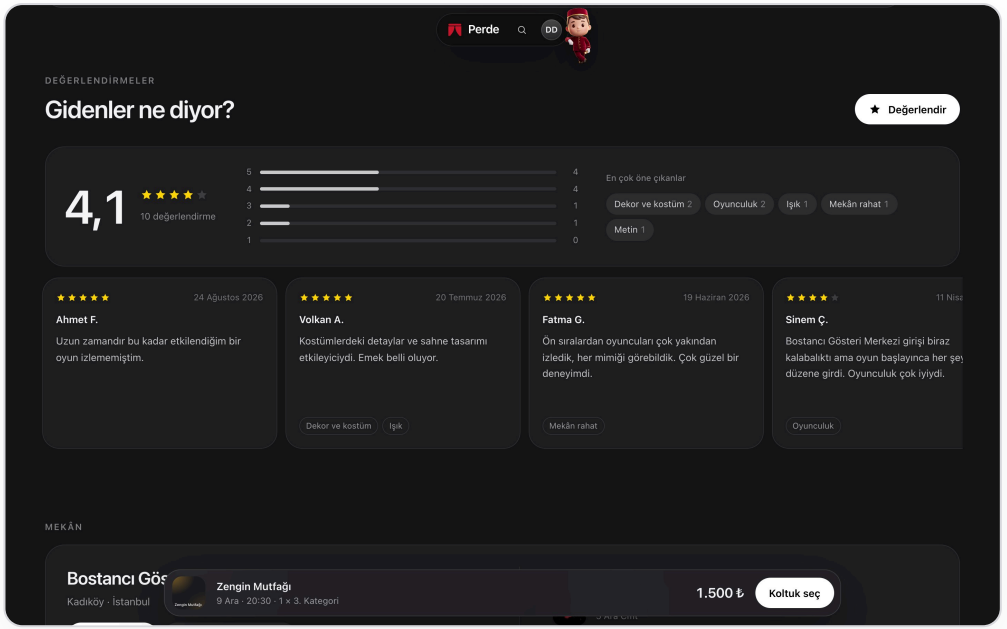

Explore → Explore
Theatre → Category: Theatre
Search → Search
My tickets → My tickets
Ask Suflör → Suflör – AI assistant
Choose seats → Seat selection

12 Ratings & reviews

EVENT · DESKTOP 1440 × 900

Wireframe sketch

Final design (implemented, Turkish UI)

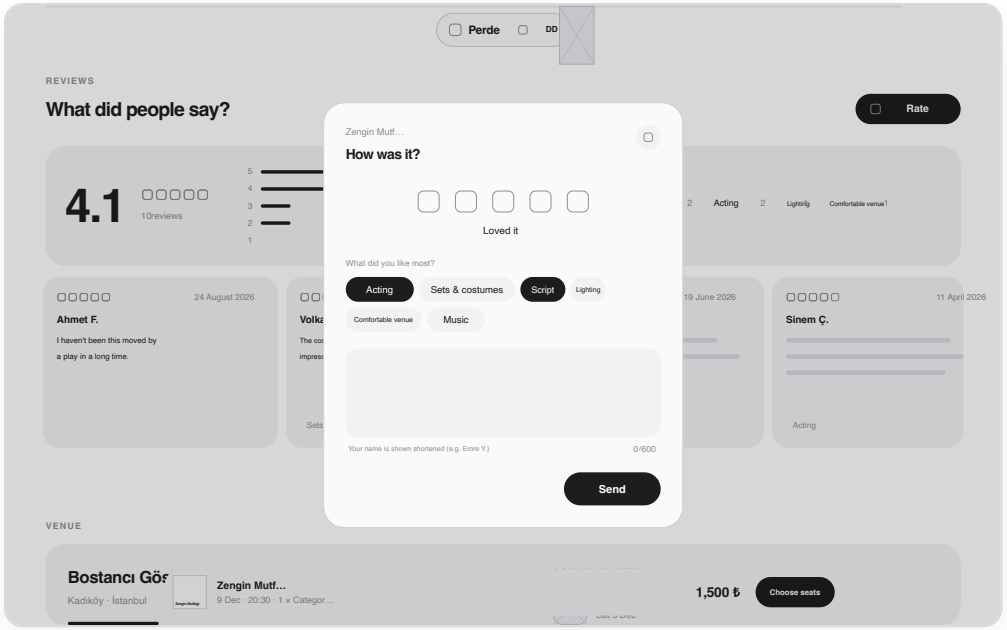

App Store-style rating summary, top tags and review cards. Ticket holders get a “Has ticket” badge.

Explore → Explore
Search → Search
Ask Suflör → Suflör – AI assistant

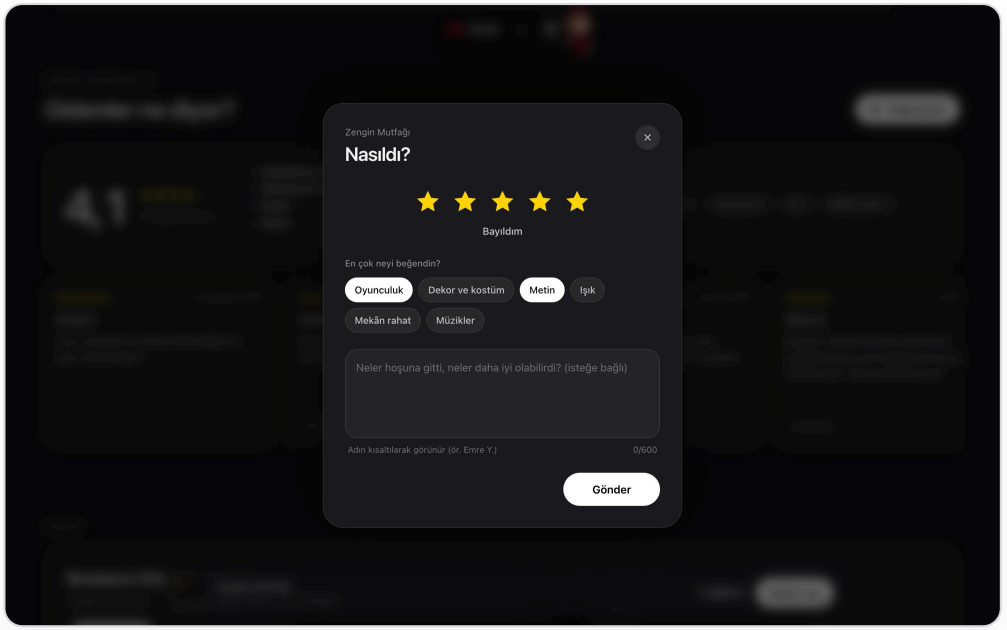

Write a review → Write a review
Choose seats → Seat selection

13 Write a review

EVENT · DESKTOP 1440 × 900

Wireframe sketch

Final design (implemented, Turkish UI)

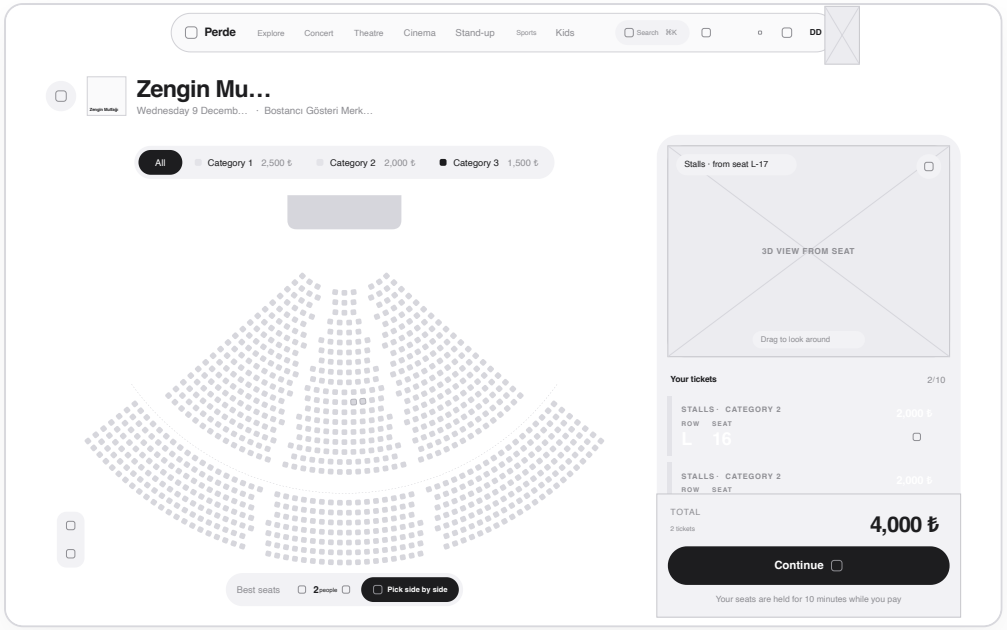

Tap the stars, pick tags and optionally write a comment. One review per member per event.

Send → Ratings & reviews

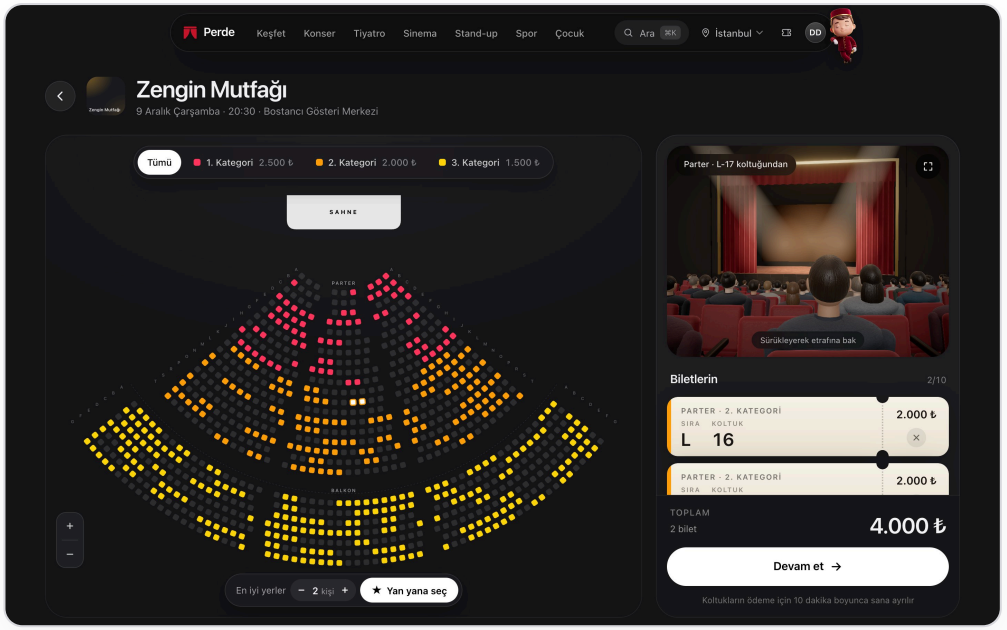

Close → Ratings & reviews

14 Seat selection

TICKETING · DESKTOP 1440 × 900

Wireframe sketch

Final design (implemented, Turkish UI)

Generated seat map with zoom, best adjacent seats and a 3D view from the selected seat. Tickets are shown as paper stubs.

Explore → Explore
Theatre → Category: Theatre
Search → Search
My tickets → My tickets

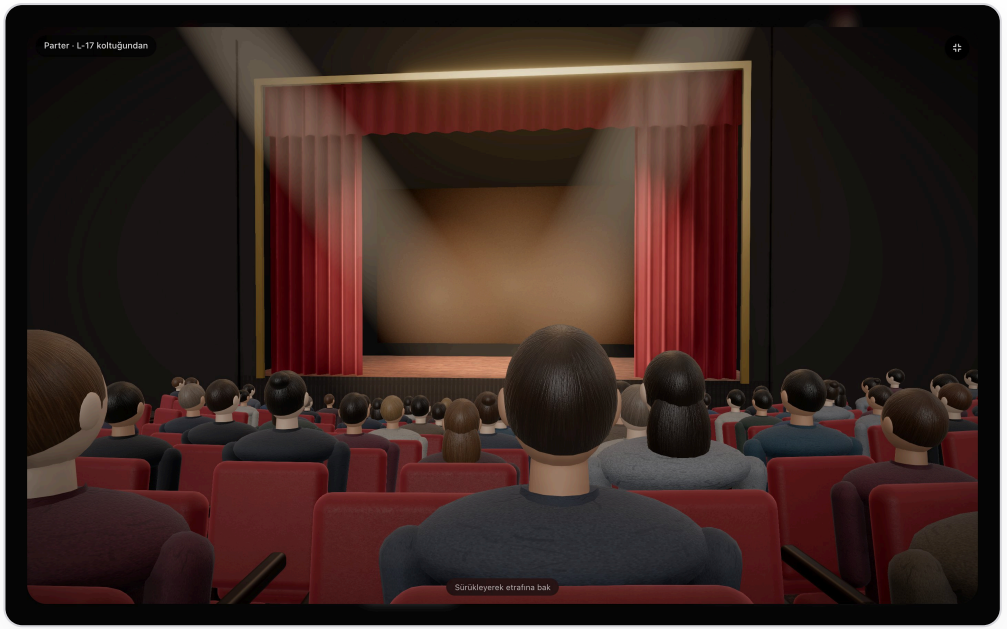

Ask Suflör → Suflör – AI assistant
Full-screen 3D view → View from your seat (3D)
Continue → Checkout

15 View from your seat (3D)

TICKETING · DESKTOP 1440 × 900

Wireframe sketch

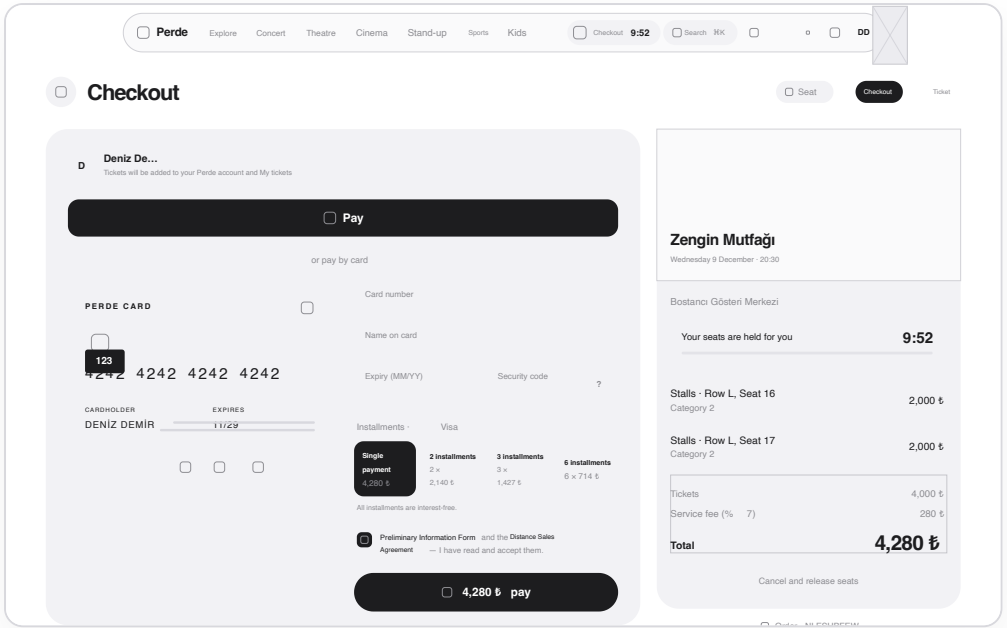

Final design (implemented, Turkish UI)

Real-scale 3D hall with velvet seats, audience and stage lighting. Drag to look around.

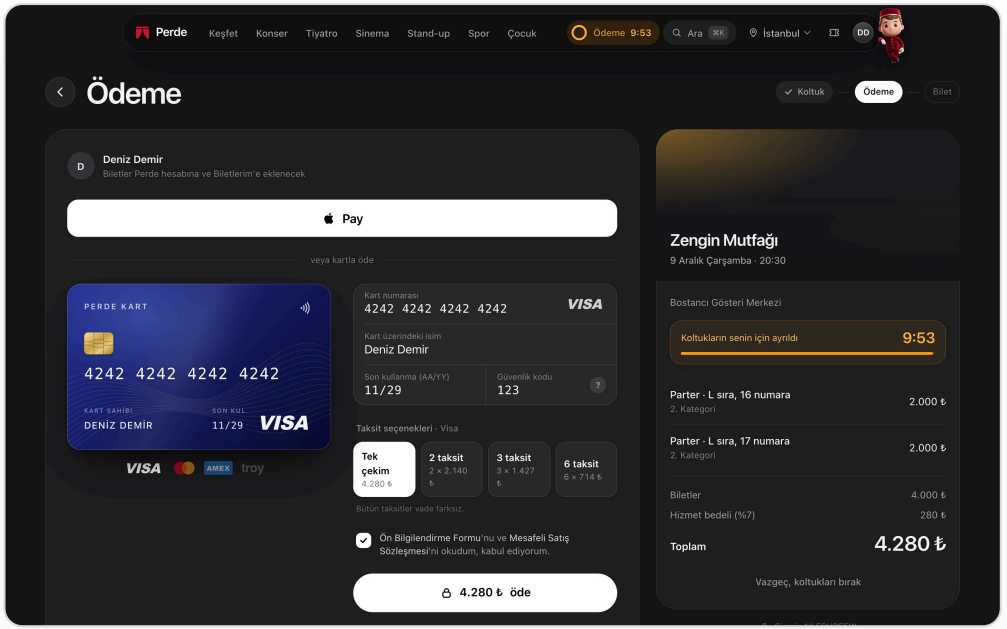

Close → Seat selection

16 Checkout

TICKETING · DESKTOP 1440 × 900

Wireframe sketch

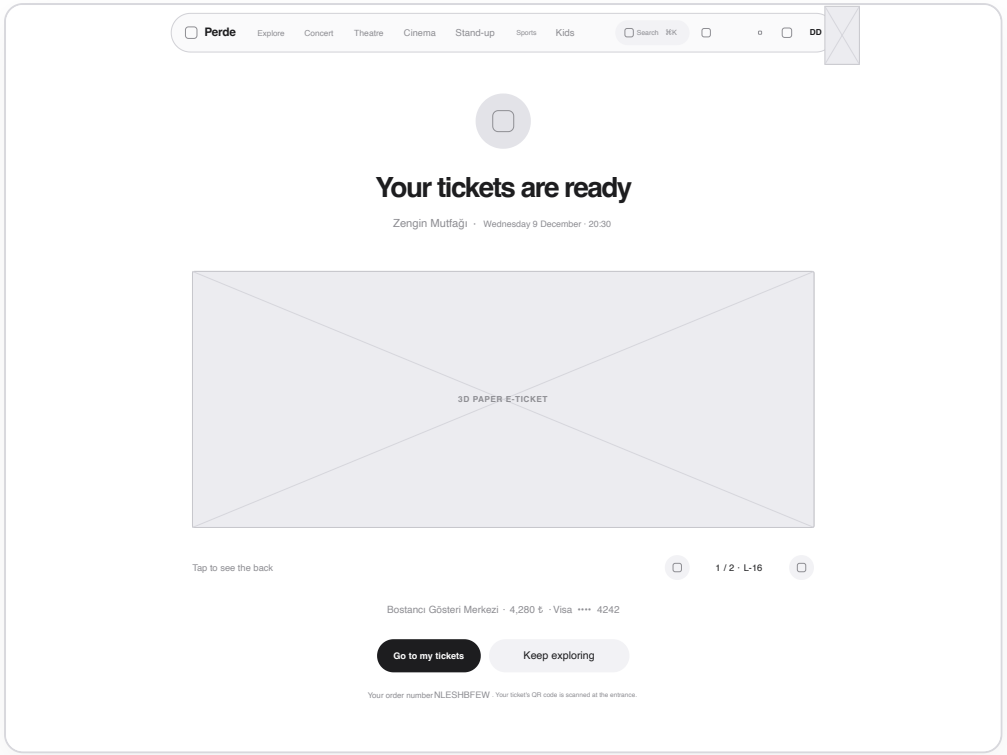

Final design (implemented, Turkish UI)

Seats are held for 10 minutes (countdown in the island). Demo card form with live card preview, brand detection, Luhn check and installments.

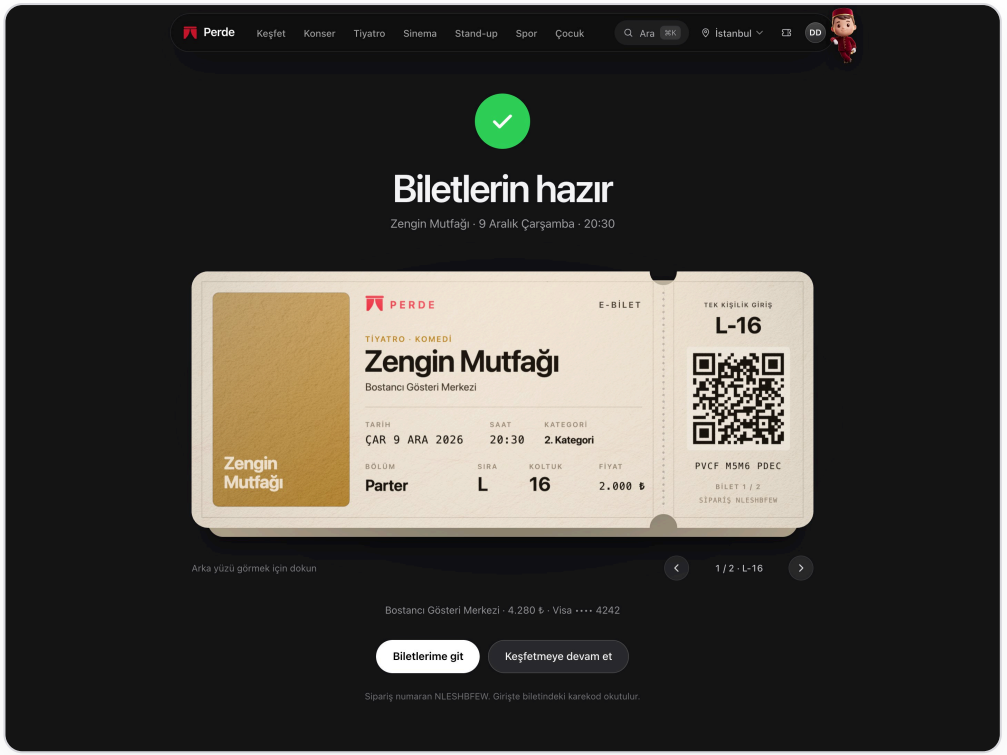

Pay → Tickets are ready

17 Tickets are ready

TICKETING · DESKTOP 1440 × 900

Wireframe sketch

Final design (implemented, Turkish UI)

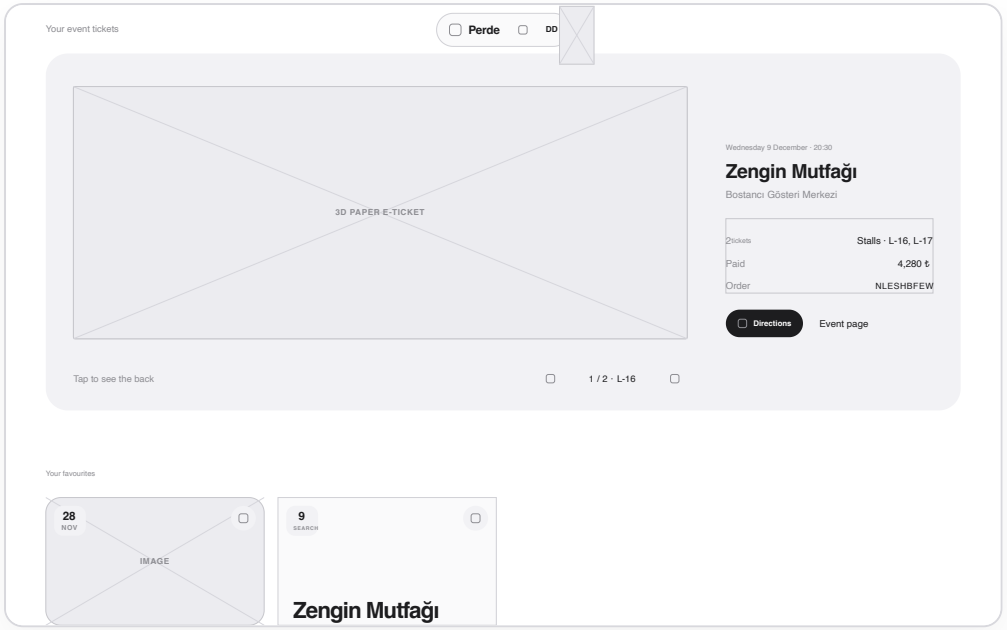

Payment confirmed. The paper e-ticket with a real QR code is cut and appears in 3D.

Explore → Explore
Theatre → Category: Theatre
Search → Search

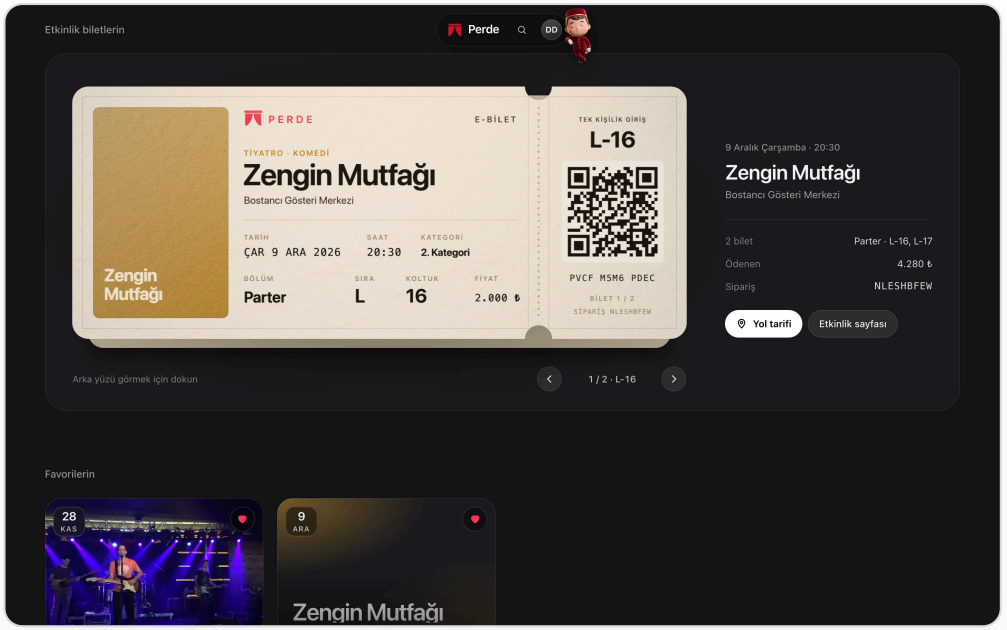

My tickets → My tickets
Ask Suflör → Suflör – AI assistant
Go to my tickets → My tickets

18 My tickets

ACCOUNT · DESKTOP 1440 × 900

Wireframe sketch

Final design (implemented, Turkish UI)

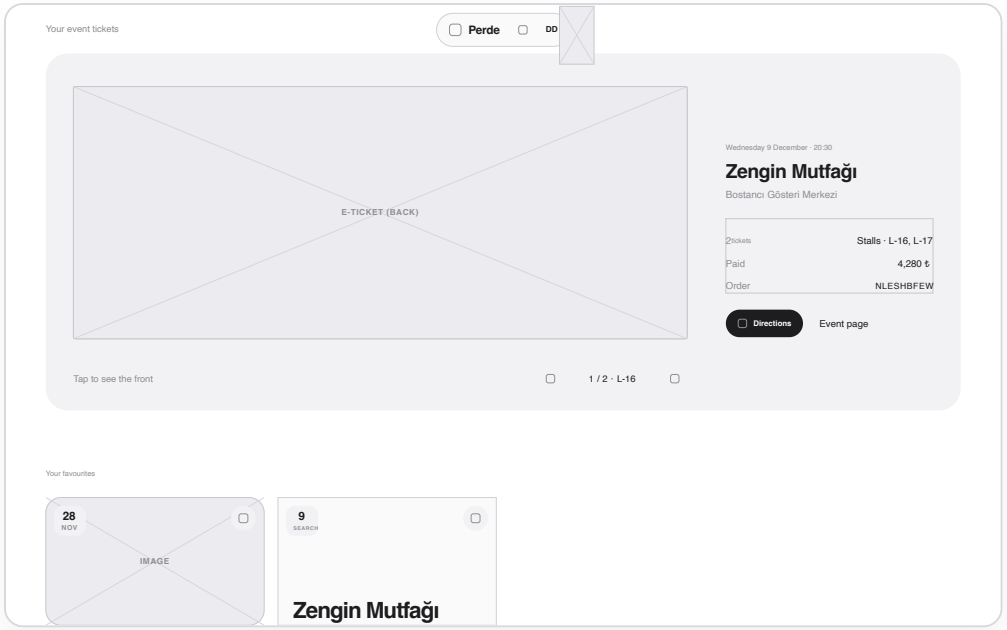

Every order as a 3D paper ticket: offset-printed artwork, seat, QR code. Tap to flip; arrows switch between tickets.

Explore → Explore
Search → Search
Ask Suflör → Suflör – AI assistant

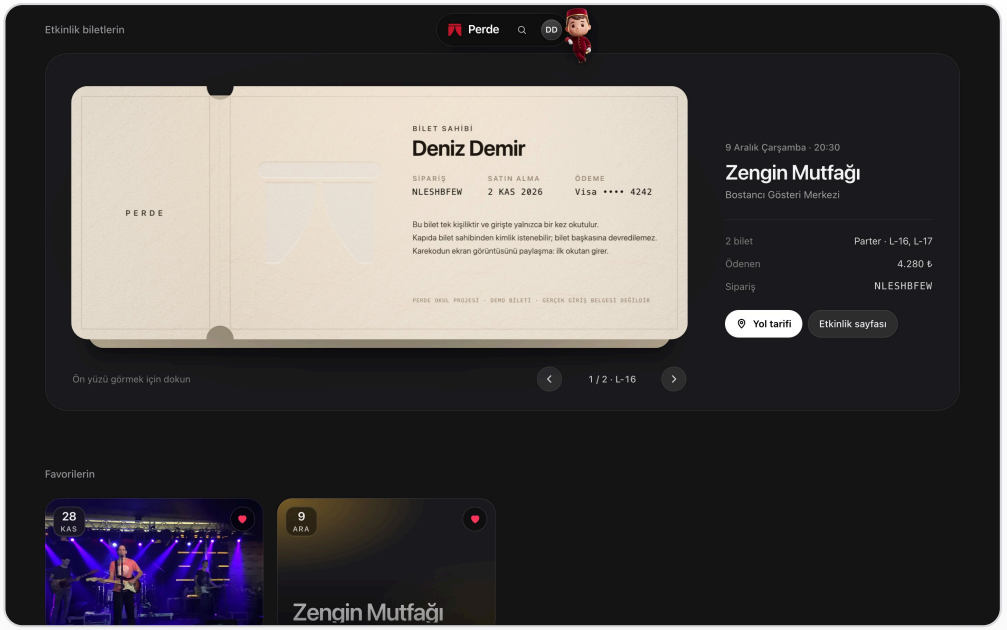

Flip ticket → Ticket – back side
Event page → Event page

19 Ticket – back side

ACCOUNT · DESKTOP 1440 × 900

Wireframe sketch

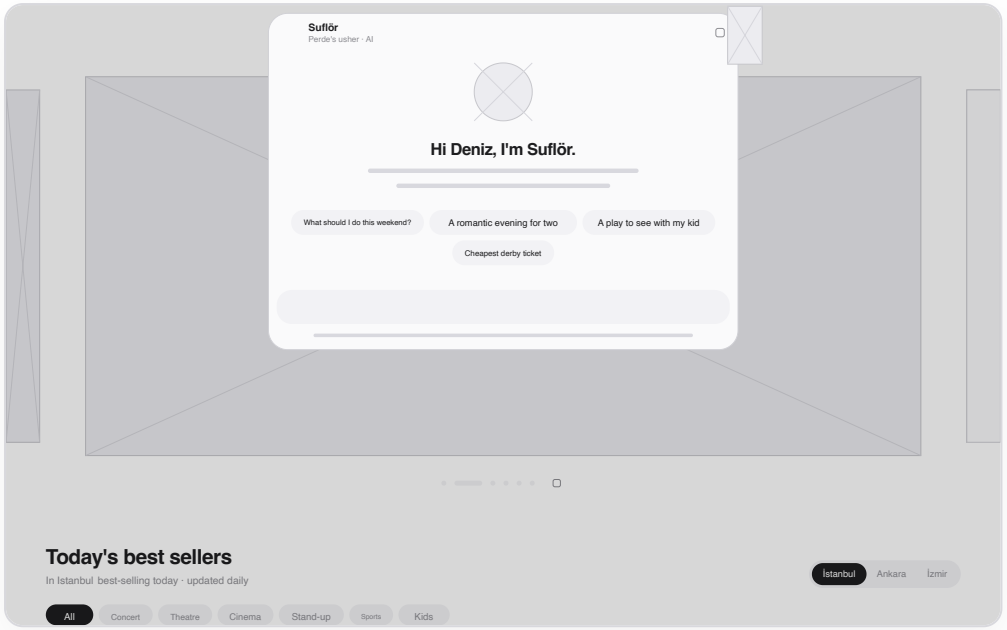

Final design (implemented, Turkish UI)

The back shows the ticket holder, order number, payment and conditions.

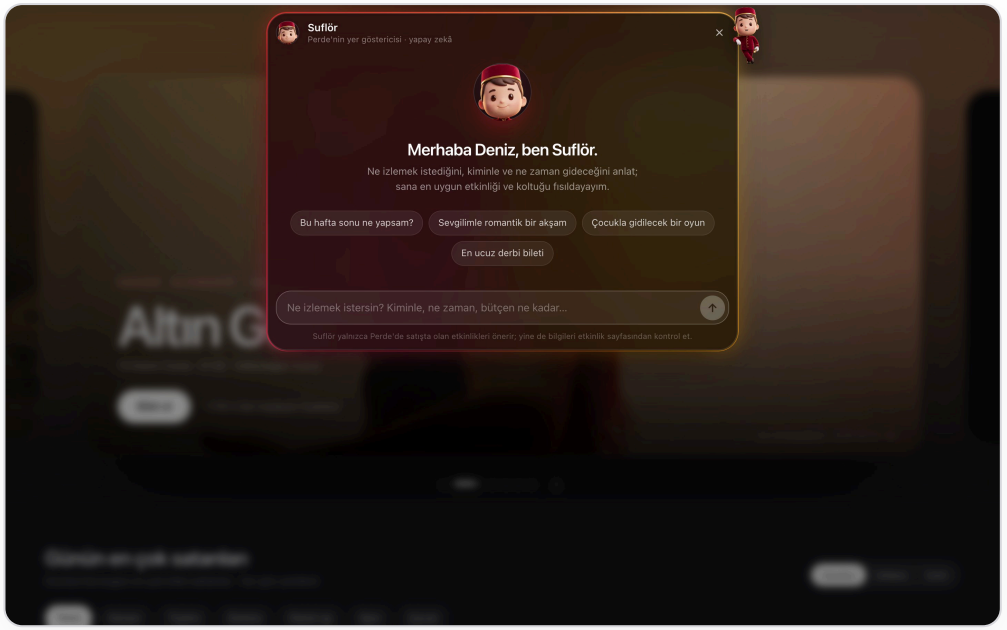

Explore → Explore
Search → Search
Ask Suflör → Suflör – AI assistant
Flip back → My tickets

20 Suflör – AI assistant

AI · DESKTOP 1440 × 900

Wireframe sketch

Final design (implemented, Turkish UI)

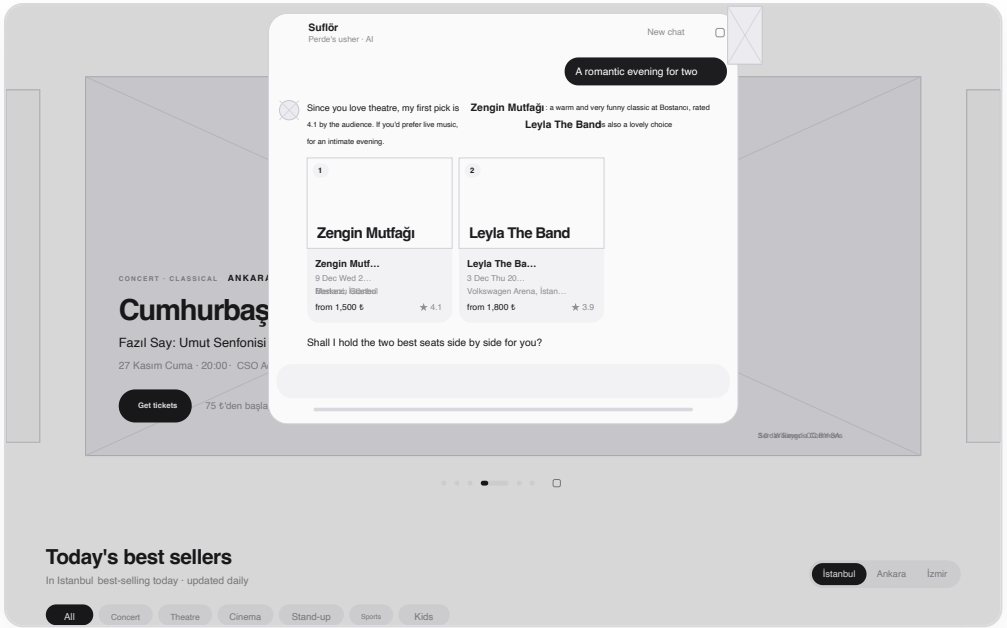

Tapping Suflör turns the island into a chat panel with a warm, rotating stage-light glow and quick suggestions.

Suggestion → Suflör – recommendation

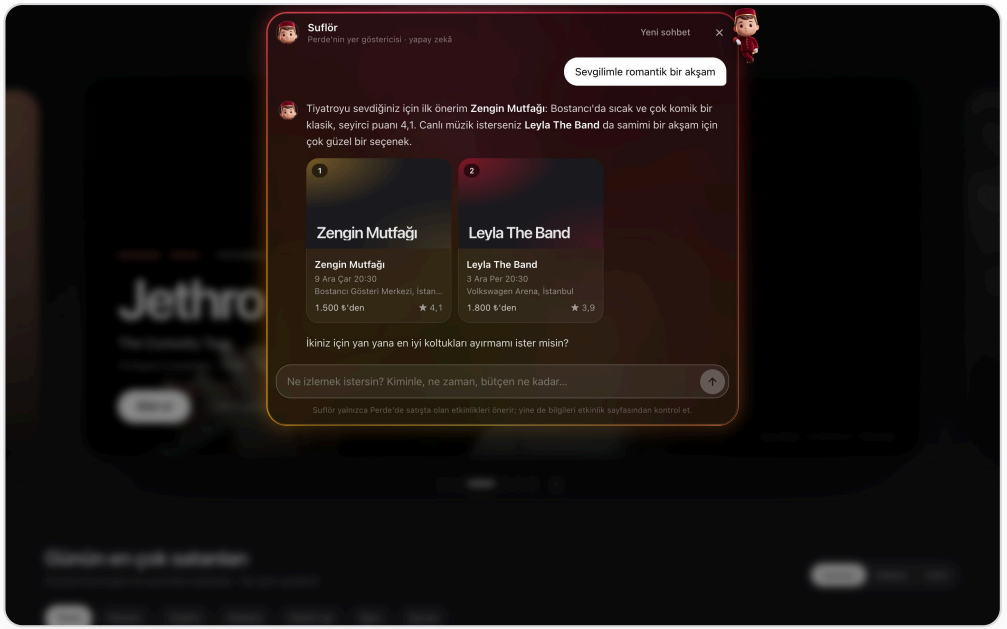

Close → Explore

21 Suflör – recommendation

AI · DESKTOP 1440 × 900

Wireframe sketch

Final design (implemented, Turkish UI)

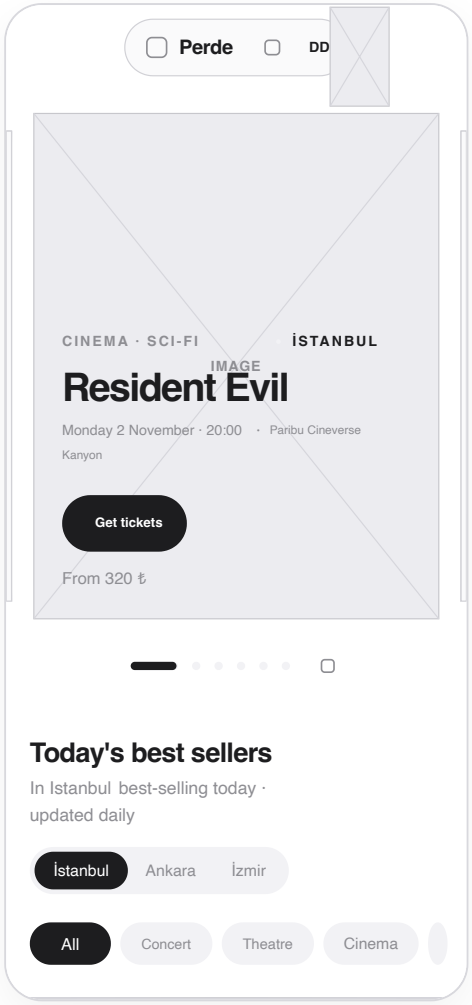

Suflör answers from the live catalogue, explains why each event fits and shows event cards. It can open the seat map with the best seats pre-selected.

Event card → Event page

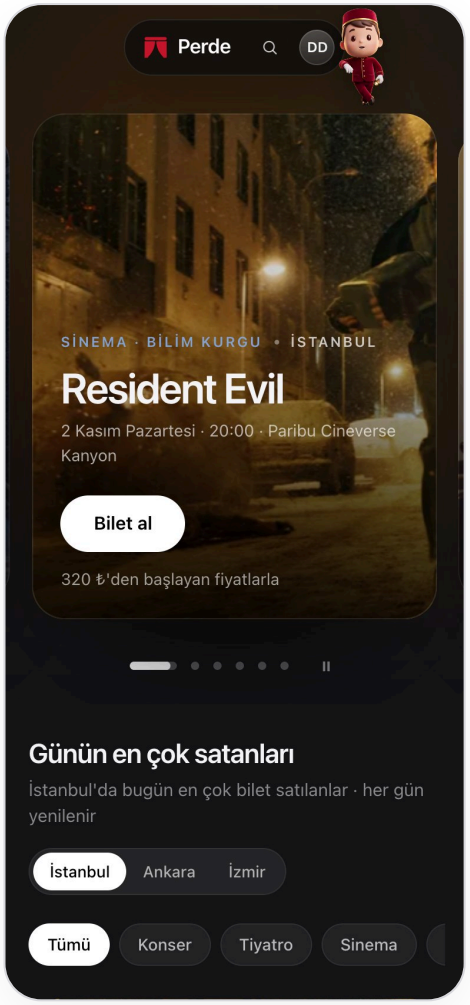

Close → Explore

22 Mobile – Explore

MOBILE · PHONE 390 × 844

Wireframe sketch

Final design (implemented, Turkish UI)

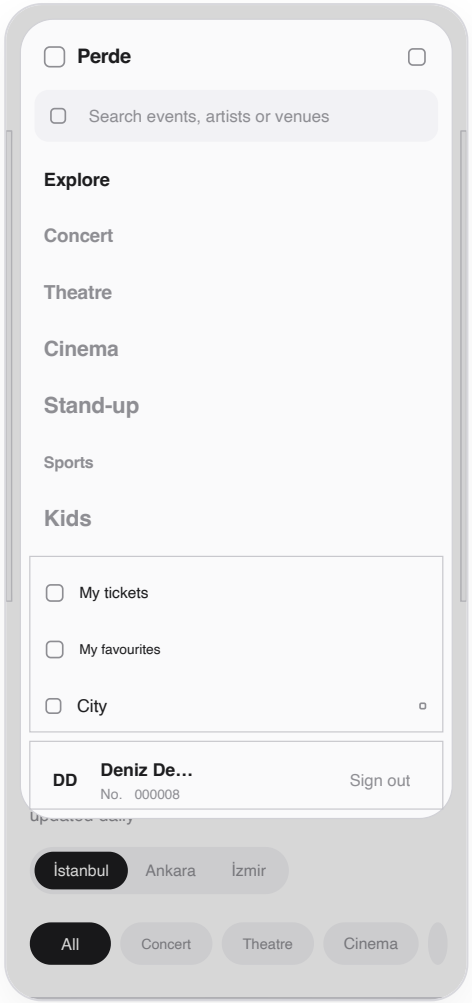

Compact island on phones; the featured card fills the width.

Menu → Mobile – Menu

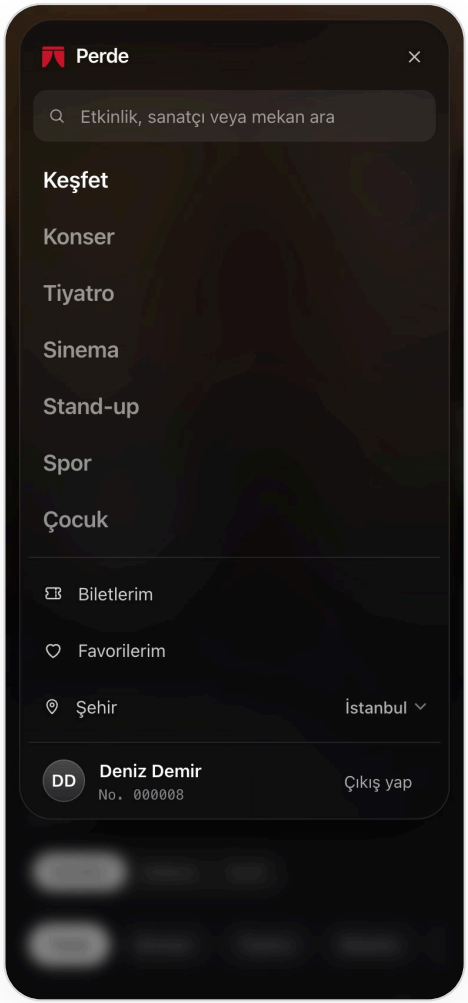

Get tickets → Mobile – Event page

23 Mobile – Menu

MOBILE · PHONE 390 × 844

Wireframe sketch

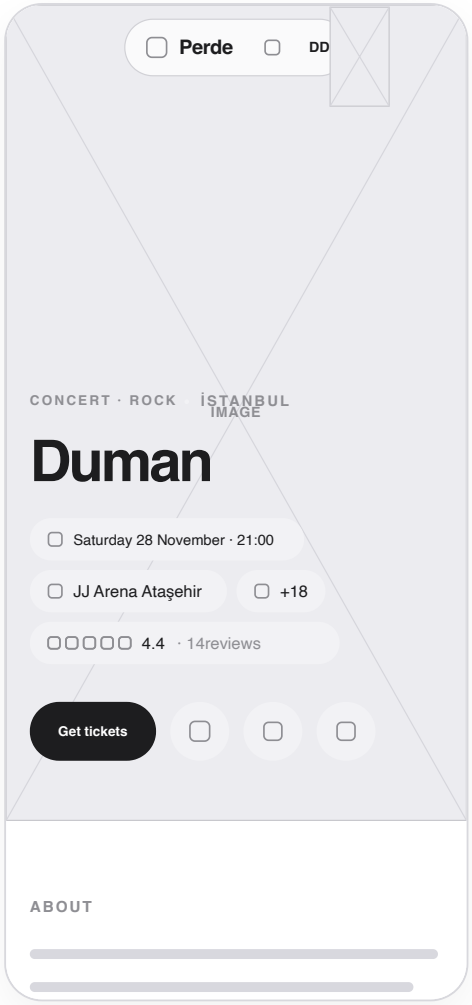

Final design (implemented, Turkish UI)

The island expands into a full menu with categories, tickets, favourites and city.

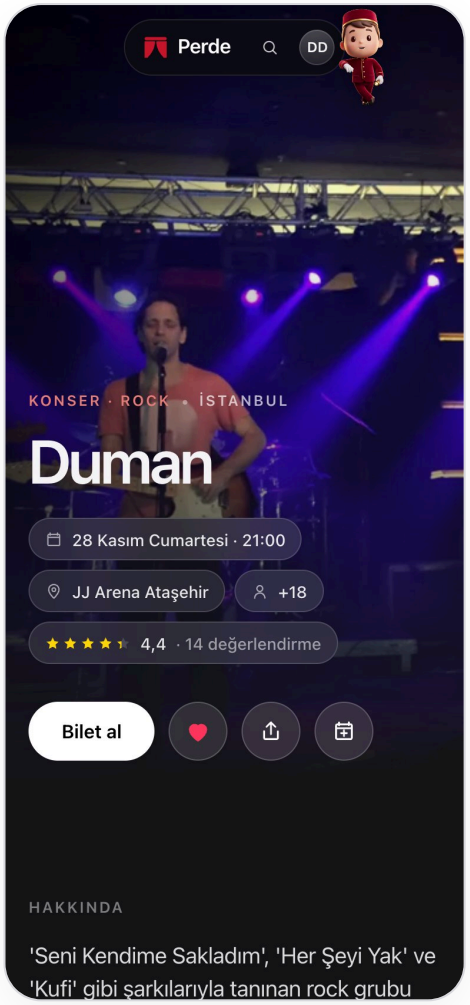

Close → Mobile – Explore

24 Mobile – Event page

MOBILE · PHONE 390 × 844

Wireframe sketch

Final design (implemented, Turkish UI)

Event page on a phone with the sticky buy bar.

Back to Explore → Mobile – Explore
